

FINALE OF SKYWALKER

Focuses more on Ben Solo and his gradual transition from tortured to sarcastic and swashbuckling. Throughout, he retains his dominating stance and personality. The main focus is on Ben and Rey's rocky and emotionally dark relationship.

Obi Wan explains what is happening to the True Resistance. He tells them they must race against the Watchers to recruit legendary heroes to their side before the Watchers can. Force disruptions are forcing out the souls of those in the Netherworld back to life. The Neo Republic claims the Force is doing this because of harmful rituals that the Second Order is performing. The armies of the Neo Republic descend to impede the True Resistance. Jedi and Sith realize they must work together against the Watchers, as the Sith do not want their powers taken away. The Neo Republic uses the ruby artifact to trick Jedi into working together with them. However, Obi Wan says there is one who houses a power to make people cured of this trickery: Anakin. Anakin's descendants all also have this power; their Force worlds inherited part of this Passion, which flows through bloodlines. This is the sapphire Passion, a secret one not found in Jedi texts. To use it, the one it is in must journey into their own soul world, overcome its obstacles, and retrieve it.

During this journey, a light side Maul is recruited by the True Resistance, but a younger, dark side Yoda is revived, and works with the True Resistance. Inside, the two have memories of their former selves, but these are stored deep within and only appear as ghostly voices in their minds. Ahsoka, Dooku, Asajj, and Sheev are recruited by Obi Wan, while the Watchers take Qui Gon, Mace Windu, Shaak Ti, and most of the other Jedi. Quinlan, joining the cause, is shown to have survived Vader's attack and now is elderly with a mechanical lower half. Anakin is split into two selves: his dark and light side. His light side is recruited by the Watchers, whereas his dark side follows Sheev. Sheev proves invaluable for exploiting the Sith Passions that the Watchers stole; the Watchers are unable to truly handle them, so Sheev is able to secretly 'hack' into them, directly allowing the True Resistance to take down the Watchers.

R2D2 and C3PO are featured prominently in the True Resistance. Rey is not related to Palpatine.

Meanwhile, to gain trust in the public and to intimidate the 'Second Order', the Neo Republic executes Hux in front of a large public crowd. Gnovian takes control and installs a new general, Pryde, to oversee the task of hunting down the remnants of the Second Order (which is the True Resistance).

Unbeknownst to the public, the Watchers and Gnovian send Hailden, now donning a new mask to make the public think he is a Jedi, to join Pryde on the hunt. Hailden is sent on a separate mission to find Ben, and try to turn Rey against him so she can kill him.

Rey and Ben meet on a pond-like planet of dew. They decide to fight together against the Watchers. Alone, they retrieve the last, hidden sapphire Passion, which requires their dyadic bond to unlock, and which was hidden in Ben's world. As they do, they fight through forces of etheric enemies sent by the Watchers to impede them. When the Passion is retrieved, Ben starts to change. During this, they confess their feelings for one another, and passionately kiss.

After getting the last Passion, Rey now possesses 3 Passions, while the Watchers have 97. Finn and Poe, along with HQ-7, are separated from the True Resistance during an attack, and they meet up with Rey and Ben. The four put aside their differences- with Ben and Finn realizing their shared past as forced soldiers of the First Order- and journey on. From the Passion, they are able to fight against the Ruby

Artifact used by Kiyla to brainwash people. They decide that they have to journey to strategic locations and communities and convince them to join their side. Key communities are hubs with many allies; recruiting them would mean recruiting large parts of the galaxy. Here, the fight is not directly against the Neo Republic, but against the communities torn between the two sides. However, a covert ops force led by Hailden does fight against them. They utilize Leia's silver artifact trapped in Ben to try to get others to listen. Ben is able to apparate it through his hands and project it, but can't transfer it.

Finn and Poe begin a relationship with one another.

Force Disruption turn Luke into his younger self, now in his 30s. He senses Obi Wan, and meets up with the True Resistance. He finally meets his father, and both are now around the same age. Slowly, Luke is able to turn dark side Anakin back to the light, and when the dark and light Anakin meet during the final battle, they converge and become one. Han is also revived and is recruited. Later, they learn a mysterious duo has been on the same journey, too, and revived many allies. They find them, and see that it is a younger Leia, fighting with a lightsaber, and Padme. Han and Leia re-kindle their relationship.

Rey and the others press on, Rey is continuously contacted by the Watchers. She is still not 100% on the side of the others, and is secretly harboring distrust for what they are doing. This is because while she is able to resist the Ruby Artifact due to her bond with Ben, who holds the sapphire Passion within him, the Ruby Passion still affects her and enhances her existing self doubt. Eventually, after seeing Ben forced to attack innocents in self-defense and not trusting him (the sapphire is not able to overcome the ruby in some cases), along with other damning evidence, Rey is turned to the side of the Watchers. This occurs 2/3 into the story. The Watchers have put on a fake show, and entrapped Rey into it.

2/3 into the movie, the True Resistance crosses paths with Ben and Rey, just after she joins the Watchers. Ben is attacked and in danger, and Han tries to save him, but is swept away back before he can, as the True Resistance pulls him back to escape the dying moon. To save Ben from Hailden and Pryde, Chewbacca sacrifices himself, piloting a ship that crashes into Pryde's armada and pushes them all down into the surface of a moon. Rose is able to find a way to resist the Ruby Artifact for a few seconds, and uses her will to enact an explosion that is vital for Finn to go and rescue Poe, who has been captured by the Neo Republic and is being tortured for information. Finn thinks Rose died in the explosion, but after the final battle, finds that she is still alive. Finn gives part of his life force so that she can heal and stops her from dying. Finn is the only one who has healing powers; he obtains these from a Passion he takes. He cannot revive the dead, however.

The most pivotal part of the movie is when Anakin confronts Ben in person. Ben is angered that Rey has turned and is still harboring hate for the innocents who distrust him. But soon, after Chewbacca sacrifices himself for him, he meets the voice in his head- Anakin, but only his dark side. Ben reluctantly listens to him about meeting Luke, and when the two see one another, they discuss their convoluted past. Luke explains to him the philosophy he learned- that the Jedi must be negotiators, and must help those on the dark side, not just shun them away or kill them. This marks the conclusion of Luke's journey, which is what set off the Watchers to hate Luke and want to control the Force, taking it away from individuals. As the True Resistance has rushed away and only Anakin and Luke are near Ben, Ben rushes towards the Watchers in a separate attack, accompanied by his grandfather and uncle. He has now embraced a balance of both the dark and the light, and trusts the True Resistance (which he did not before, despite slowly learning to get along with Finn and Poe). His distrust in it before had impeded his journey.

Lando, Klaud, Jannah, and Zorri also join the True Resistance.

Force disruptions have made ships able to travel so fast, they can warp and blitz from planet to planet. They also bend space and time, making something lightyears away bend close by. They shrink and enlarge regions of space. Wormholes appear everywhere, and through the wormhole it isn't just black nothingness, but a distorted image of what's on the other side. Wormholes can be the size of a large building, or even a planet.

Due to these Force Disruptions squeezing everything together the final battle takes place in the entire galaxy. The True Resistance consists of junkyard, steampunk-like ships and weapons, along with ancient tribal-like light projectile Jedi ships, while the Neo Republic is a titanic, military might. Celestial bodies such as Naboo, Coruscant, Hoth, Mustafar, Bespin, Endor, and Geonosis are seen during the battle, with troops smoothly moving from one to another.

Finn confronts Gnovian and Citho. They do not have lightsabers, but fight with other Force powers. Finn is able to use the Force to enhance his battering weapons and guns he used as a Stormtrooper. Donning parts of re-tweaked Stormtrooper armor, with the mask not completely shielding his face (as the mask was broken), he goes into battle. He gets a chance to kill them both, but does not, as he chooses not to take the path of revenge. Instead, he uses the Passions to render both of them powerless, unable to use the Force anymore. The chain of command in the Neo Republic is also dissolving, so they cannot command the troops either. Gnovian is captured as a prisoner of war, but Citho flees.

Ben fights and kills Hailden. Then he moves into the center of the galaxy, journeying into its Supermassive black hole to fight the Watchers, who reside there to harness the power to siphon the Force from all. This black hole has two accretion disks that constantly rotate in and out of one another. Rey, who is now the most powerful figure of the Neo Republic, follows him inside. The Skywalker is unable to contest her, so he tries to reach into her Force world to reach her from there. Rey destroys Ben's red saber. Just as Rey is about to kill Ben, he reaches her, and she stops. Instead of killing Ben, she turns and unleashes her power on the 'mirrored curtains' that the Ruby Artifact creates, shattering the fake world around her and taking back control of herself from the Watchers. Now relinquishing all the new powers given to her, Rey is reverted back to her natural self, and fights the Watchers with Ben. The Watchers try to break her lightsaber, but when it splits in two, Ben and Rey each take half of it and use it as their own.

Once Rey shatters the Ruby Artifact, the Jedi are returned to the light, and join the True Resistance. Now Sheev is able to enact his plan, and the Sith betray the True Resistance, plotting to take the Watchers' powers for themselves. Joined by only Dooku, who realizes that despite being killed by the Emperor's orders the only way he can return to power is by following his old master, Sheev first kills many of the Jedi and True Resistance members, then kills many of the elites in the Watchers' ranks including Citho. He comes close to stealing the Watchers' powers, as the dyad is distracting the two main Watchers and thus Sheev is able to sneak into the Watcher's soul worlds. Their soul worlds are the most reinforced and hardest to break in, but Palpatine manages to do it. However, Obi Wan and Anakin had anticipated this, so had thought of a plan to stop them and had caught on to Sheev's illusions. Obi, Anakin, Luke and Leia follow Dooku and Sheev into the Watchers' soul world. While Dooku duels Obi Wan, Asajj stealthily creeps in and kills her former Sith master in a sneak attack out of revenge, as Dooku killed an elderly Quinlan earlier before the final battle, and he thought he killed Asajj, too. Together, Leia, Luke and

Anakin duel Sheev and Anakin kills him; then, the handful of remaining Sith, including the younger dark side Yoda, scatter.

During the final battle, many of the Jedi are killed. In order to stop the strongest attack from the Watchers, most heroes sacrifice their lives to create an energy defense that nullifies the attack; this includes Anakin, Padme, Ahsoka, Qui Gon, and Mace Windu. Their sacrifice severely weakens the Watchers, allowing their strongest powers to be stolen and forcing them to relinquish much control over the galaxy. Meanwhile, Ben and Rey struggle against the Watchers and nearly die. Just then, Luke descends into the black hole, and with his help, Ben and Rey take some of the Watchers' powers back from them and use them to enhance their own strength, now allowing them to match Alstaire and Kiyla. Alstaire wields a giant pronged lance that he uses with intimidating strength and precision, while Kiyla has two enormous axes. Her movements are ghostly, wild and terrifying, like dancer of Boreal valley. The four duel one another, while Luke, after confronting the Watchers, is greatly injured. From afar, the troops watch the two binary accretion disks of the galaxy's center glow, as they align with the dyadic heroes. When Ben and Rey fight Alstaire and Kiyla, the perversion of the Passions is too great, and the resulting battle shatters the tides of the black hole they are in, stopping the duel and forcing all four into danger. Ben and Rey save one another, but Alstaire betrays Kiyla, and after Kiyla dies, Alstaire dies too as no one helps him escape (this mirrors the end of *The Mummy Returns*). Ben and Rey help Luke get up, with Ben carrying him on his shoulder like Luke did with Vader, and they escape the black hole that collapses the ritualistic region the Watchers resided in. The three enter a Force disruption that sends them to an isolated, barren Ahch-To.

On Ahch-To, due to the consequences of the ancient Jedi/Sith Passions the dyad used, Rey reveals to Ben that she must apparate to an unreachable corner of the Unknown Regions outside the galaxy. The two say that they are happy to have found one another. Rey is now content with being alone, as in her heart, the others are still connected to her, despite being in a whole other galaxy. Before, she needed the admiration of others due to her lonely childhood on Jakku, and thus needed others to see her as a hero. Now, she does not need to be around others to feel connected to them; she trusts that they will always remember her, as long as their bond with her is strong. She does not need the approval of random strangers as a 'savior'; she only needs to protect them, and turn to the bonds of her close ones to feel content. Before the two depart, they break apart a lightsaber trinket that was forged out of the one Ben stole from Rey's world when they were children, and they each take half of it to remember each other by.

With Force disruptions gone and the galaxy bouncing back to equilibrium, Luke, Leia and Han grow older again, but are now in their 50s instead of being in their 70s. Luke restarts his Jedi School, while Ben becomes a bounty hunter, wandering as a nomad in the steps of his father, finally being able to fit in Han's footsteps, as he struggled to do so when he was young. After the final battle, Ben meets Leia and Han again, who forgive him. He must work to redeem himself, too. The New Republic is not re-established, but an entirely new governmental system is created. The light side Maul and Yoda isolate themselves, needing to find their own places in the galaxy. Rose remains a humble mechanic, starting her own business. Finn and Poe begin a relationship, and both serve under the new government.

In the unknown regions, Rey is on a strange desert planet- resembling a lofty, wispy dream- and she meets a few locals. After sensing her immense power, they ask who she is descended from. The scavenger girl smiles as she says along the lines of "Nobody important". In a mindful state of

presentness, calm and serene, she does not lose hope that she can find her way back into the galaxy again. She moves through the beautiful dream-like world, with only her staff in hand. She looks down at a trinket she is holding, which Ben gave to her before they departed.

From afar, Ben, who is also alone inside a ship traveling through empty space, senses her. He takes his piece of the trinket, and gazes into it. He then looks from outside his window, and though sad, he smiles, as the camera pans close to his face. Next, the scene cuts to a close up of Rey, then to her face as she gives off the same sort of smile, and the movie ends.
